

# CYBER SECURITY 2019

Radisson Blu Hotel Oslo  
24. - 25. April 2019

The NFEA Cyber Security conference in 2019 will focus especially on the subjects Cyber Safety and Cyber Security.

We are very proud to present our keynote speaker Robert M. Lee, CEO and Founder of the industrial (ICS/IloT) cyber security company Dragos, INC. He will give a crossover lecture on these two subjects, and will «set the scene» for the conference.

Apart from the keynote, we showcase a lot of exciting lectures "covering topics of interest for Norway and abroad. The 2019 conference will continue the previous focus on the IEC62443 standards and what practical implications it will have for the different businesses.

We will also give good, practical examples and experiences from the area of Cyber Security – both incidents and Mitigations will be covered. Risk identification and analyses will also be covered this time.

## 24. APRIL
