

«CALL FOR PRESENTATIONS»

CYBER SECURITY 2025

9.-10. APRIL, CLARION HOTEL OSLO

This letter is a «Call for Presentations» and an Invitation to the Conference “Cyber Security 2025”.
Save the dates 9. – 10. April 2025 in your calendar already now! The full program and registration will be available later.

We are currently calling for presentations on multiple topics. Send us an abstract of your presentation of maximum length 1/2 page, together with your Title, your Name, Company Name, telephone number and email by **October 31** at the latest.

Proposals for presentations are submitted via the following form: <https://no.surveymonkey.com/r/CFPCyberSec2025>

Cyber security is of increasing importance in Norway for most industries. With this conference, NFEA intends to show how real the cyber threats are for different areas of society, and which practical measures large and small companies and institutions have taken to meet the threats. We will use the time to exchange experiences and discuss best practices as well as lessons learned about things where we have room for improvement. We will investigate what can be done to improve cyber security with a focus on Operational Technology (OT) and give practical examples of how cyber incidents have been handled. Up to date information on International Standards cybersecurity in OT and how they are used in practice for various companies’ processes and procedures will also be presented.

We are looking for abstracts covering the following topics:

- **Lessons learned from implementing cyber security in industrial automation and control systems**
- **Cloud security for OT environments**
- **How AI can impact the cyber security of OT environments**
- **OT asset management, both for operations and cyber security**
- **Logging and visibility of OT environments**
- **Cyber incident response for OT environments**
- **Standards, guidelines and best practices for cyber security in OT environments (NIS2, IEC62443)**
- **Autonomy, connectivity and cyber security**
- **Cyber Security and supply chain issues**
- **Cyber risk assessments for OT environments**

The conference is organized by NFEA – Norwegian Society of Electrical- and Automatic Control. Information will also be available soon from our web interface www.nfea.no. If you have any questions, contact NFEA directly.

The Committee requests professional and technical proposals and not marketing of specific solutions, brands or companies. Please specify which of the topics the presentation is about.

The conference will be held in English.

Audience:

This conference is suitable for anyone who is interested in the field of cyber security.

Members of the Committee:

Committee chair: Marie Moe – Google, Knut-Erik Tovslid – Triple-S, Judith Rossebø – ABB, Øystein Brekke-Sanderud – NORMA Cyber, Pål Børre Kristoffersen – DNV, Lars Erik Smevold – Statkraft, Karin Sundsvik - NFEA, Tonje Olsen Benestad – NFEA.
